

RUBBER *surfacing*

Advanced Polymer Technology has ideal solutions for children's playground flooring, play or child care areas, parks, aged care facilities, pool decks/water parks, walking trails, decking, porches and other areas where a soft secure surface is needed to ensure safety and peace-of-mind.

Our product can be laid in and around existing obstacles or equipment and to any specification as it is installed using a "wet pour" process. This rubber surfacing product is highly shock absorbent and can be molded to any design and color specifications.

Once again, another seamless quality APT product designed with total flexibility and safety in mind. Made from EPDM/SBR rubber granules and shreds, APT's rubber surfacing ensures a secure comfortable textured finish providing ideal grip and outstanding shock absorption. Highly durable and resistant to harsh climate extremes, APT's rubber surfacing is the ideal solution and is virtually maintenance free.

APT is proud to be united with Melos of Germany. Melos is the market leader in the production of colored EPDM granules. Like APT, the Melos name is synonymous with quality.

- Durable, long lasting, water resistant
- Firm grip and cushioning characteristics
- Virtually maintenance free
- All weather surface
- Wide range of colours available
- Highly UV resistant.
