EAST/WEST LAY FOR SYNTHETIC BOWLING GREENS - THE FACTS

Recently there has been a certain amount of mis-information circulating regarding the issue of East/West laying of grass for synthetic grass Bowling Greens and the status of Manufacturer's warranties.

We'd like to take the opportunity to clarify this matter. We have been in contact with APT, our manufacturer, who has confirmed that when laid for North/South bowling only, all warranties are valid for East/West laid synthetic greens.

Many Clubs are now choosing to only bowl North/South and, in many instances, are able to save on the m² of grass used and the cost of the new surface. Traditionally, this has been how narrow width greens in Lifestyle Villages and Retirement facilities have been laid, and there have been no warranty restrictions placed on these installations. We would also like to note that the wear factor on a diagonal lay or East/West lay will be the same for North/South bowling.

To obtain a copy of the Manufacturer's letter, or for further information, contact Tony at Green Planet Grass on 9209 2669 (office) or 0411 109 036 (mobile).
