

Lawn  
Reborn™

# for artificial grass

Lawn Reborn™ substantially neutralises & reduces the smell of dog urine on synthetic lawns.

Unfortunately, if you have a dog and your synthetic grass hasn't been installed using PetFill™, it will probably develop an extremely unpleasant odour.

This odour is caused by 2 factors; ammonia in the urine & subsequent bacterial growth which may occur.

Lawn Reborn™ is an enzyme product which destroys the bacteria that causes this smell. It's a high performance, non-toxic and 100% biodegradable multiple enzyme solution. Manufactured from a unique blend of naturally occurring multi-enzymes, fermented natural products, essential nutrients and surfactants. This product does not contain live bacteria. It's a light brown viscous solution with a pleasant herbal smell.

### Features of Lawn Reborn™

- Neutralises odours
- Creates a healthier environment for both families & pets
- Biodegradable
- Non-toxic (safe around children & pets)
- Environmentally friendly – won't damage garden plants
- Specially formulated to work with PetFill™
- Made in Australia
- Lawn Reborn™ can also be used for cleaning and deodorising carpets, floors, tiles and pet bedding.

### Application of Lawn Reborn™

- To be diluted 1 part Lawn Reborn to 40 parts clean water then applied using either a watering bucket or spray
